*Colotis pallene* (Hopffer, 1855)

Lycaenidae butterfly upp & und.

Common Blue und.  
*Cycliurus pinthosus* (Linnaeus, 1767)

*Iolaus* sp. und.

Estas Lycaenidae borboletas têm antenas e olhos 'falsos' atrás. Quando um pássaro ataca o lado 'errado', a borboleta pode escapar e com sorte, sem danos sérios. – These little Lycaenidae butterflies have 'false' antennae and eyes on its hind wings. When a bird attacks the 'wrong' side, the butterfly might be lucky to fly off unharmed.

PIERIDAE NYPHALIDAE  
LYCAENIDAE PAPILIONIDAE

♀ = fêmea – female ♂ = macho – male w.s.f. = forma da estação chuvosa – wet season form d.s.f. = forma da estação seca – dry season form und. = lado inferior – underside upp. = lado superior – upperside
